GOSPORT

HASELWORTH PRIMARY SCHOOL SUPPORTING PUPILS WITH MEDICAL CONDITIONS POLICY

Policy approved:	September 2020	FGB
Signed:	<i>N Jones</i>	Headteacher
Signed:	<i>C Roast</i>	Chair of Governors
Date of next review:	Spring 2021	Annually
Monitored and evaluated by:	School Business Manager	Termly

Supporting Pupils with Medical Conditions Policy

In line with the duty, which came into force on 1st September 2014, to support pupils at school with medical conditions we are committed to ensuring that all children with medical conditions, in terms of both physical and mental health, are properly supported at Haselworth Primary School so that they can play a full and active role in school life, remain healthy and achieve their academic potential.

No child with a medical condition will be denied admission or prevented from taking up a place in our school because arrangements for their medical condition have not been made.

We will ensure that pupils' health is not put at unnecessary risk from, for example, infectious diseases therefore we will not accept a child in school at times where it would be detrimental to the health of that child or others to do so.

This policy will be reviewed regularly and it is readily accessible to parents and school staff.

Policy implementation

The named person, who has overall responsibility for policy implementation is the Headteacher.

They will

- ensure that sufficient staff are suitably trained;
- ensure that all relevant staff will be made aware of the child's condition;
- cover arrangements in case of staff absence or staff turnover to ensure someone is always available;
- brief supply teachers;
- carry out risk assessments for school visits, holidays, and other school activities outside the normal timetable; and
- monitor individual healthcare plans.

Procedure to be followed when notification is received that a pupil has a medical condition

When our school is notified that a pupil has a medical condition we will:

- make arrangements for any staff training or support
- make every effort to ensure that arrangements are put in place within two weeks
- not wait for a formal diagnosis before providing support to pupils

Individual healthcare plans

Our school will send home a health questionnaire. Any parent reporting that their child has an ongoing medical condition such as asthma, epilepsy, diabetes or more complex medical condition will be asked to complete an Individual Healthcare Plan (IHP). It is a legal requirement that this is updated annually. At our school we will ensure that plans are reviewed at least annually, or earlier if evidence is presented that the child's needs have changed. We will assess and manage risks to the child's education, health and social wellbeing, and minimises disruption.

Our IHP requires information about:

- the **medical condition, its triggers, signs, symptoms and treatments**;
- the **pupil's resulting needs**, including medication (dose, side effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements and environmental issues, e.g. crowded corridors, travel time between lessons;
- specific **support for the pupil's educational, social and emotional needs** – for example, how absences will be managed, requirements for extra time to complete exams, use of rest periods or additional support in catching up with lessons, counselling sessions;
- the **level of support** needed (NB If a child is self-managing their medication, this should be clearly stated with appropriate arrangements for monitoring)
- **who will provide this support**, their training needs, expectations of their role and confirmation of proficiency to provide support for the child's medical condition from a healthcare professional; and cover arrangements for when they are unavailable;
- **who** in the school **needs to be aware** of the child's condition and the support required;
- **arrangements for written permission from parents and the Headteacher for medication to be administered by a member of staff, or self-administered by the pupil during school hours**;
- arrangements or procedures required for **school trips** or other school activities outside of the normal school timetable that will ensure the child can participate, e.g. risk assessments;
- **what to do in an emergency**, including whom to contact, and contingency arrangements. Some children may have an emergency healthcare plan prepared by their lead clinician that could be used to inform development of their individual healthcare plan.

Roles and responsibilities

At our school those people involved in arrangements to support pupils at school with medical conditions include:

- School Business Manager
- The Admin Officers
- The Inclusion Leader/SENDCo

Any member of school staff may be asked to provide support to pupils with medical conditions, including the administering of medicines, although they cannot be required to do so. Although administering medicines is not part of teachers' professional duties, they should take into account the needs of pupils with medical conditions that they teach. School staff should receive sufficient and suitable training and achieve the necessary level of competency before they take on responsibility to support children with medical conditions. Any member of school staff should know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help.

Staff training and support

Staff are supported in carrying out their role to support pupils with medical conditions through appropriate training. Training needs are assessed regularly and training will be accessed through HTLC.

Any member of school staff providing support to a pupil with medical needs will have received suitable training.

No member of staff will give prescription medicines or undertake healthcare procedures without appropriate training or instruction (updated to reflect requirements within individual healthcare plans).

The child's role in managing their own medical needs

Where children are deemed competent to manage their own health needs and medicines by their parents and medical professional they will be supported to do this. We see this as an important step towards preparing pupils for the next stage of their education.

Managing medicines on school premises

At our school:

- medicines will only be administered at school when it would be detrimental to a child's health or school attendance not to do so
- no child will be given prescription medicines without their parent's written consent
- we will never give medicine containing aspirin unless prescribed by a doctor.
- Medication, e.g. for pain relief will never be administered without first checking maximum dosages and when the previous dose was taken.
- Parents will be informed
- where clinically possible, we will expect that medicines will be prescribed in dose frequencies which enable them to be taken outside school hours
- we will only accept prescribed medicines if they are:
 - **are in-date**
 - **are labelled**
 - **are provided in the original container as dispensed by a pharmacist**
 - **include instructions for administration, dosage and storage.** *(NB The exception to this is insulin, which must still be in date, but will generally be available to schools inside an insulin pen or a pump, rather than in its original container)*
- all medicines will be stored safely.
- Children will know where their medicines are at all times and will be able to access them immediately. Where relevant, they will know who holds the key to the storage facility. Medicines and devices such as asthma inhalers, blood glucose testing meters and adrenaline pens will be always readily available to children and not locked away, including when pupils are outside the school premises, e.g. on school trips
- when no longer required, medicines will be returned to the parent to arrange for safe disposal. Sharps boxes will always be used for the disposal of needles and other sharps
- controlled drugs that have been prescribed for a pupil are securely stored in a non-portable container and only named staff have access. Controlled drugs will be easily accessible in an emergency. A record will be kept of any doses used and the amount of the controlled drug held

- school staff will administer a controlled drug to the child for whom it has been prescribed. Staff administering medicines will do so in accordance with the prescriber's instructions.
- **We will keep a record of all medicines administered to individual children, stating what, how and how much was administered, when and by whom. Any side effects of the medication to be administered at school will be noted in school**

Non-prescribed medicines

We will not accept any non-prescribed medicines into school but we will keep a small stock of homely remedies, such as you may have at home, which will include:

- Liquid paracetamol (Calpol)

These will only be administered when it would be detrimental to the child not to give and only with your permission.

Due to the ongoing Covid pandemic, we will not administer Calpol at this time to children as we believe this may mask potential Covid symptoms. We have made parents aware of this.

Record keeping

We will ensure that written records are kept of all medicines administered to children. We recognise that records offer protection to staff and children and provide evidence that agreed procedures have been followed. Parents will be informed if their child has been unwell at school.

Emergency procedures

Our school's policy sets out what should happen in an emergency situation.

Non serious

- All head injuries will be seen and assessed by a qualified first aider.
- Pupils suffering from a head injury will not be left unattended by school first aid staff until they are confident that a serious injury has not been sustained.
- The first aider will advise the class teacher of the incident as they return to class.
- Provide a copy of a bumped head notification to the receiving member of staff and a Parent Mail will be sent.
- Whilst the child remains in school they should be supervised to ensure no deterioration in their wellbeing.
- When a seemingly well pupil returns to class they will be advised to speak to their teacher or return to the school office if they begin to feel unwell.
- The school will not offer the injured child any pain relief unless the school holds a completed and signed medical form giving clear instruction to offer the medicine.
- In the case of non-serious injuries not requiring external medical examination, where appropriate, parents will receive a phone call from a school first aider advising them of the injury, and the circumstances of the accident.
- The first aider in charge of treatment will keep a record of each pupil attended to, the nature of the injury and any treatment given. They will also record the time and location of the accident.

- Parents will also receive a “bumped head” letter (see attached) to ensure they are fully aware of the injury and the need to monitor their child’s wellbeing for the next 24/48 hours.

Serious

- The school will insist that any casualty who has sustained a significant head injury is seen by professionals at the hospital, either by sending them directly to hospital (in the case of an adult) or by asking parents to pick up a child to take them to hospital (non-critical injuries).
- Parents, the Headteacher and teaching staff will be made aware of all significant head injuries sustained in school.
- Where necessary the first aider will seek information from pupils, or supervising adults, who witnessed the accident.

The following signs have been recognised as symptoms of a serious head injury and they should be recognised by all staff:

- Worsening headache
- Nausea/sickness
- Dizziness
- Sleepiness
- Failure to focus visually
- Confusion
- Memory loss
- Dilated pupils
- Paleness (shock indicator)
- General distress/shakiness
- Unsteadiness when they walk

Any pupil displaying any of these symptoms following a head injury should be assessed immediately by a first aider.

Day trips, residential visits and sporting activities

We always actively support pupils with medical conditions to participate in school trips and visits, or in sporting activities, and not prevent them from doing so.

As a school we believe it to be unacceptable practice to

- prevent children from easily accessing their inhalers and medication and administering their medication when and where necessary;
- assume that every child with the same condition requires the same treatment;
- ignore the views of the child or their parents; or ignore medical evidence or opinion (although this may be challenged);
- send children with medical conditions home frequently for reasons associated with their medical condition or prevent them from staying for normal school activities, including lunch, unless this is specified in their individual healthcare plans;
- if the child becomes ill, send them to the school office or medical room unaccompanied or with someone unsuitable;
- penalise children for their attendance record if their absences are related to their medical condition, e.g. hospital appointments;
- prevent pupils from drinking, eating or taking toilet or other breaks whenever they need to in order to manage their medical condition effectively;

- **require parents, or otherwise make them feel obliged, to attend school to administer medication or provide medical support to their child, including with toileting issues. No parent should have to give up working because the school is failing to support their child's medical needs;** or
- prevent children from participating, or create unnecessary barriers to children participating in any aspect of school life, including school trips, e.g. by requiring parents to accompany the child

Liability and indemnity

Maintained schools and academies with a SLA with HCC will be insured as long as all appropriate training and risk assessment has taken place. Haselworth Primary School subscribes to the SLA.

Complaints

If you have a complaint about how your child's medical condition is being supported in school please contact the Headteacher and the Chair of Governors in the first instance.

Emergency Asthma Inhalers and EpiPen.

Since 2015 schools may hold asthma inhalers for emergency use. This is entirely voluntary, and the Department of Health has published a protocol which provides further information. As a school we have agreed to purchase and keep emergency inhalers and a epiPen.

Inhalers will only be used for those children who are already prescribed asthma inhalers or in an emergency where we are instructed to do so by a medical professional. The school will seek to use the child's prescribed inhaler if possible.

In case of emergency, it is permitted for a school to administer the school's own epi-Pen. This will only be used in the event of an emergency where we are instructed to do so by a medical professional.
